
Fermat's Last Theorem
Frey curve
Ribet: level lowering
semistable modularity
no solutions, $n \geq 3$
Poincaré conjecture
Ricci flow
surgery
finite extinction
homeomorphic to S^3
sphere packing in dim. 8, 24
LP bound
auxiliary functions
finite inequality checks
E_8, Leech densest
Navier–Stokes breakdown
self-similar vortex
pulses cancel the residual
corrections to all orders
alternatives (C), (D)
paper and formal proof compared
Hodge conjecture
HC $\iff$ (F2) and (F3′)
dense loci: all or meagre
(F2) on abelian varieties
(F3′) on abelian varieties
Yang–Mills mass gap
lattice gap, $\beta_W < \frac{2}{9}$
no spacing-uniform route
continuum limit with a gap
checked by a proof assistant
published proof
open
